

PRESS RELEASE

Montpellier, February, 4th, 2008

IMMEDIATE RELEASE FOR MOBILE WORLD CONGRESS
BARCELONA - Feb 11-14, 2008

Pleyo unveils « Origyn Suite », the comprehensive multimedia Web-Services Platform for all Consumer Electronic Devices.

Origyn Suite is a multimedia Web-Services Platform dedicated to mobile and home-based CE devices such as mobile phones, personal multimedia players, digital radios, GPS, e-book readers, etc., as well as TV Decoders, multimedia photo-frames, media-centers, Home-Gateways, DVRs, etc.

Origyn Suite supports various devices with a wide range of services, and an adapted User Interface responding to the ergonomic and characteristic specificity of the Device and including a Synchronisation Engine.

Origyn Suite is bundled with the Origyn Family composed of **Origyn Web Browser** (an open-source Web Browser for CE devices) and **Origyn Web Extensions** (a library of Web-extensions to control the device and its contents from the Web Browser).

Origyn Suite bundles A-grade Web-Services, delivered in standard mode for free with premium features with an access fee. These services are based on blockbusters solutions improved with an Adapted User Experience.

Lastly, **Origyn Suite** includes an outstanding feature: an adaptative layout for existing services such as a large library of iPhone widgets. This adaptative layout makes these applications compatible with devices using **Origyn Web Browser**.

PLEYO will demonstrate **Origyn Suite** on mobile phones, PMP's and TV decoders.

Join PLEYO at the Mobile World Congress Barcelona in Hall 2 - Booth 2E59 !
